PROFILE

I am a final-year Computer Science Engineering (CSE) student with a strong foundation in programming and software development. I have gained hands-on experience in Artificial Intelligence and Machine Learning through academic projects and continuous learning. I am a quick learner, passionate about solving real-world problems, and eager to grow through practical industry experience while contributing to a collaborative team

EDUCATION

Qualification	Institution	Score	Duration	Location
Bachelor of Technology (CSE)	CMR Technical Campus | JNTUH	**CGPA: 8.31**	2023 – 2027	Medchal, Hyderabad
Intermediate (MPC)	Narayana Junior College	**88.4%**	2021 – 2023	Suchitra, Hyderabad
SSC	St. Peter's Grammar School	**CGPA: 10.0**	2021	New Bowenpally, Hyderabad

SKILLS

Category	Skills
Programming Languages	C, C++, Python, Java
Web Technologies	HTML, CSS, JavaScript (Basic)
Core Concepts	Networking (TCP/IP), Operating Systems
Tools & IDEs	Jupyter Notebook, Visual Studio Code (VS Code), Microsoft Office

TRAINING

Ongoing training at Smart Interviews

INTERNSHIP

PROJECT INTERN | Information Data System

Duration: 05 May 2025 – 06 June 2025
Technologies: Hedera Hashgraph, Blockchain, Java, HTML

- Developed a secure **Online Election Voting System** using Java, HTML, Hedera Hashgraph, and Blockchain technologies.
- Implemented voter authentication and a **one-vote-per-voter** mechanism to ensure secure and fair elections.
- Designed an intuitive interface for voter registration, authentication, and online vote casting.
- Integrated blockchain-based validation to enhance data integrity, transparency, and security throughout the voting process.

PROJECTS

Drowsiness Detection
Technologies: Python, OpenCV, TensorFlow, Keras, Computer Vision, Deep Learning

- Developed a real-time **driver drowsiness detection system** using Python, OpenCV, and Deep Learning.
- Implemented **facial landmark detection** and **Eye Aspect Ratio (EAR)** to identify signs of driver fatigue.
- Integrated webcam-based monitoring with real-time alert mechanisms to improve road safety.
- Improved detection accuracy through image preprocessing and model optimization.

Hotel Booking UI
Technologies: HTML, CSS, Python, JSON

- Developed a responsive Hotel Booking User Interface for hotel search, room selection, and booking
- management.
- Designed intuitive web pages using HTML and CSS to enhance user experience.
- Utilized JSON for efficient data storage and Python for backend logic and processing.
- Improved navigation and booking workflow with a clean and user-friendly interface.

AI-Generated Snake Game with React
Technologies: React, TypeScript, HTML, CSS

- Developed a modern **Snake Game** using React and TypeScript with responsive gameplay.
- Implemented interactive game logic, score tracking, and smooth keyboard controls.
- Integrated AI-generated components to streamline development and improve gameplay features.
- Built a responsive user interface with optimized performance for a seamless gaming experience.

ACHIEVEMENTS & ACTIVITIES

- **150+ LeetCode** problems solved.
- **2nd Place** – Smart India Hackathon (SIH) 2024.
- Member – CodeOHolics Club & Intel Club, CMRTC.
- Participated in Google Cloud Arcade, Web3 & Blockchain Workshop, AI Masterclass, Tata Crucible Quiz, and Flipkart E-Commerce Quiz.
- **Strengths:** Quick Learner, Adaptable, Team Player, Problem Solver

CERTIFICATIONS

Hashgraph DeveloperIDS Blockchain	**Certificate of Appreciation**TECHNOVANZA – 4.0	**Cyber Security**Deloitte
Smart India Hackathon 2024 2nd Place	**Python Programming** Cisco Networking Academy	**Data Analyst**Deloitte
Agentforce Salesforce	**Facilities & Property Management** CBRE	**Cyber Security**Infosys

CODING PROFILES

HackerRank – harshini.y2006
Leetcode – 237R1A05R6
Codechef – safe_frogs_13
